________________________________________________________________________________________
Remediation Objectives and Plan:
________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________
Learner must complete this remediation plan by: ______________________________

Failure to complete this remediation plan will result in a failing grade for the clinical course.

A clinical warning is warranted for any activities that: violate agency or college policy and procedure; place a patient at risk; are inconsistent with the assignments delegated to the student by faculty; fail to meet expectations for clinical or lab preparation; fail to demonstrate professional respect and/or behavior; and/or any error that indicates the learner is unsafe to practice. If the clinical incident is a patient safety concern, any further warnings involving patient safety can result in failure of the entire course.

Instructor signature ______________________________ Learner signature ____________________________

Learner signature indicates that the learner has been informed of unsatisfactory clinical evaluation.
